C++ Developer in Soarian project

Location: Brasov

Company description:

With over 100 years of presence in Romania, period of technical achievements, innovations, high quality and reliable deliveries, Siemens is the biggest company in Romania that owns innovative solutions in the following sectors: Energy, Healthcare, Industry, Infrastructure and Cities. Having the headquarters in Bucharest, Siemens is also present in other regions, having work sites in Brasov, Cluj, Constanta, Craiova, Iasi, Oradea, Ploiesti, Targu Mures and Timisoara and an approximate number of 1800 employees. For more information about Siemens please visit www.siemens.ro.

CT DC (Corporate Technology Development Center) is the main software development partner for Siemens sector's business units and it provides full development services from various locations world wide. In Romania, CT DC is present in Brasov work site, from where delivers high quality software for products and customer-specific solutions, as well as professional services.

Project description:

Soarian Clinicals is a new generation IT solution produced by Siemens, that is more than a traditional HIS (Hospital Information System). Soarian Clinicals manages not just transactions and data, but also the process of care and the interactions between members of the healthcare facility (hospitals). In this landscape, the development team is responsible for ensuring that the software delivers up to the customer's expectations, having at all times strong and continuous focus on patient safety.

What are my responsibilities?

- Estimate / Design/ Code/ Unit test new features using Agile methodology.

- Interact with analysts, testers and other developers to build and verify the requirements
- Engage in customer support for the existing code (bug fixing, enhancements to improve the existing solution)
- Part of a globally distributed team, ensures proper communication between teams

What do I need to qualify for this job?

- Work experience as software developer for at least 3-4 years.
- Sound knowledge and practical experience with OOP, C++, XML, SQL and debugging skills.
- Proven Experience with HTML, JavaScript, Web development and Web Server (preferably IIS)
- Knowledge of ASP (Active Server Pages), Visual Studio 2005/2008/2010, C#, MS SQL Server database, InstallShield is a plus
- Knowledge of at least one Source Control System (preferably Clearcase)
- Knowledge of design patterns
- Experience with Agile methodology (Scrum, Kanban, Pair programming).

Soft Skills required:

- Enjoy working in a team to solve complex issues
- Ability to adjust to changing priorities and to work under pressure
- Strong analytical skills
- Proactive, result oriented
- Very good communication skills both verbally and in writing, using the English language.

Benefits

We, at Siemens, know that well prepared and motivated employees are key factors for the success of our projects and for going beyond and above our partners expectations. Hence, Siemens is investing in training the employees and in offering a good working environment and climate, to ensure the satisfaction, motivation and the performance of the employees.

- Attractive compensation package and work climate
- Meal tickets
- Yearly bonus system
- Private health and life insurance
- Private pension

- Flexible schedule and work from home policy
- Personal and professional development
- Work in healthcare domain which implies high implementation and quality standards
- Work in a very dynamic environment based on Agile Scrum and Kanban methodologies.
