What are my responsibilities?

Siemens Corporate Technology is looking for an experienced BI / BW Consultant to support one of its SAP Business Intelligence based solutions in the healthcare domain. You will be working closely with the team in Romania and Germany for further extension and maintenance of the Management Information System.

Responsibilities

- Participate in design sessions together with the already established team
- Implement new functionalities according to defined requirements and quality standards
- Provide maintenance for the created functionalities

What do I need to qualify for this job?

- Proven experience in SAP Business Intelligence and Business Warehouse
- Data modeling and ETL
- Query performance optimization
- Analysis and reporting with BEx Analyzer
- Reporting with any of Crystal Reports, Web Intelligence and SAP Dashboards would be an additional plus
- Experience with ABAP development is a big advantage

Interpersonal skills

- Good communication and team player
- Ability to learn new products and technologies

- Proactive and self-motivated

Language skills

- Proficiency in German and English

Benefits

- Attractive compensation package and work climate
- Meal tickets
- Yearly bonus system
- Private health and life insurance
- Private pension
- Flexible schedule and work from home policy
- Personal and professional development
